

This book contains detailed instructions on building the B-26K Counter Invader 1/48 scale model aircraft from ICM (Kit 48279).

In addition to the kit's instructions, the book also includes a 3D Resin Nose and Tire Replacement set from MADSAM and Eduard's set BIG ED 49326 that consists of four PE sets and die-cut mask. Can you imagine merging these instructions? Well, I've done that for you and more. I take the model kit instructions from ICM along with MADSAM & the Eduard sets and break them up into individual steps.

The aftermarket steps are colored gray making them easy to skip if you just have the basic model. This book provides a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 919 steps and 153+ figures over 193 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either ICM or AM) along with a block to mark that you completed the step.

There are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I hope you find this book useful. See a multi-page sample along with photos of finished models and other books at glennhoovermodels.com.

B-26K Counter Invader: How to build the B-26K Counter Invader Model from ICM (A Glenn

Hoover Model Build Instruction Series)
