

This book contains detailed instructions on building the AH-64E Apache 1/35 scale model aircraft from Takom (Kit 2602).

In addition to the kit's instructions, the book also includes Eduard's BIGED set 33154 which includes 321010, 33352, and JX311 and Quinta kits 35099 and 35118. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from Takom along with the Eduard and Quinta AM sets and break them up into individual steps. The aftermarket steps are colored gray making them easy to skip if you just have the basic model. This book also provides a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 1,153 steps and 190 plus figures over 275 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either Takom or AM) along with a block to mark that you completed the step.

There are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I hope you find this book useful. See a multi-page sample along with photos of finished models and other books at glennhoovermodels.com.

AH-64E Apache Model: How to build the AH-64E Apache Model from Takom (A Glenn Hoover Model Build Instruction Series)
