

This book contains detailed instructions on building the OV-10A Bronco 1/48 scale model aircraft from ICM (Kit 48300).

In addition to the kit's instructions, the book also includes instructions on eduard's PE sets 491240 and FE1241. Can you imagine merging all of these instructions? Well, I've done that for you and more. I take the model kit instructions from ICM along with the eduard set and break them up into individual steps.

The aftermarket steps are colored gray making them easy to skip if you just have the basic model. This book also provides a detailed list of tools that I used to build this model, along with a list of paints. The actual instruction section contains 764 steps and 175 figures over 178 pages that tell you what to dry fit, glue, and/or paint for each individual piece. Each step instruction shows the source (i.e., either ICM or eduard) along with a block to mark that you completed the step.

There are several pages of in-process photos with assembly tips and the final photos of my build for reference. This book is a great checklist to make your build go smoothly. Of course, you can feel free to use different tools, paint, weathering, etc. or even add your own diorama. I hope you find this book useful. See a multi-page sample along with photos of finished models and other books at glennhoovermodels.com.

OV-10A Bronco Model: How to build the OV-10A Bronco Model from ICM (A Glenn Hoover

Model Build Instruction Series)
